

## **EcoVadis awards Studer Cables AG a gold medal!**

**Working towards a better future for people and the planet requires action and real change. We are pleased to announce that Studer Cables AG has been awarded a gold medal by EcoVadis!**

EcoVadis is the world's most reliable rating for sustainability and assessed more than 90,000 companies from 200 industries in 160 countries in 2022. The Studer Cables AG team is proud to be among the top 5% of all assessed companies. We were also able to make the remarkable leap from a bronze to a gold medal in just one year.

The assessment by EcoVadis is based on 21 sustainability criteria in the four categories of environment, labour and human rights, ethics, and sustainable procurement. These categories include detailed criteria such as the company's energy consumption and emissions, various aspects of health and safety at the workplace, human rights, and also areas of personnel development.

Bruno Fankhauser, CEO of Studer Cables AG, is delighted: "Measurable

sustainability is now a common and serious requirement of our customers as well as our own company. Being awarded the gold medal by EcoVadis is proof that our efforts are bearing fruit and that this is also seen and confirmed by an independent body."

The EcoVadis process validates our sustainability efforts and commitments, practices and efficiency, providing a clear roadmap for how we can make even more impact over time.
